*...a real opportunity for you!*

RBC Bearings is a well-known international manufacturer and marketer of highly engineered precision plain, roller and ball bearings. We have been providing bearing solutions to our customers since 1919. Over the past ten years, under the leadership of our current management team, RBC Bearings has significantly broadened our end markets, products, customer base and geographic reach. We currently have 31 facilities, of which 28 are manufacturing facilities in five countries. Our selling efforts are supported by a global network of sales engineers, distributors and authorized agents.

In order to reinforce our team in Delémont, Schaublin is currently looking for an:

## Application Engineer

This position is responsible for designing, planning and monitoring bearing projects, based on customer design requirements for aerospace, railway and industrial markets and to providing technical support and assistance both internally and externally.

### Role Responsibilities:

- Review bearing applications and provide technical solutions to ensure product performance
- Provide technical support to the Sales force and Product Management teams in the areas of bearing design, cost analysis, customer support, quality assurance, production support and review of new applications
- Work with customers to resolve technical problems and conduct technical presentations with the Sales Engineers at target accounts approximately 10% to 20% of the working time will be spent in visiting customers
- Technical consultant on product design, applications and in-service problems, quality deviations and material and parts substitution
- Assure that all detail process step drawings are in conformance to the requirements and technical specifications
- Establish bearing qualification requirements and test plans and provide test reports to customers to gain product approval
- Responsible for approving product design and releasing designs to manufacturing
- Manage new projects and provide updates to management and customers

### Education & Experience:

- Bachelors degree in Mechanical Engineering or related engineering field.
- 5-10 years experience in bearing design and applications.
- Experience in project management.
- Team working, good communication skills
- Fluent in 2 languages – incl. English.

Are you interested in this opportunity? So do not hesitate! Only applications meeting all the required criteria will be taken into consideration.
